Dear Resident,

JT Utilities Ltd will carry out major street works near your property in November and throughout the winter. The works involve installing a high-voltage electric cable in the carriageway to connect a new solar farm to a nearby power station. The installation process will require long sections of carriageway to be open, with a depth of 1200mm in the highway.

To complete the works we will travel in a southerly direction along Norton Road and use several sets of traffic management in the carriageway as per below and the footway will be maintained at all times.

From November 23rd to December 2nd, 2026

Road closure between the Sewer Works and Icknield Way. This will be completed in two phases, ensuring uninterrupted access to Bowmans Green

- Phase 1, will commence from the Sewer Works to the midpoint of the entrance to Bowmans Green.
- Phase 2, will commence from the midpoint of the entrance to Bowmans Green to Icknield Way.

From December 3rd 2026 to December 14th 2026

Temporary traffic lights completed in two phases

- Three-way lights will be installed at the junction of Norton Road and Icknield Way.
- Two-way lights along Norton Road to the junction of West Avenue.
  - *Minor road closures will restrict access to streets adjoining Norton Road where alterntive entry points are available.*
  - *Access will be maintained for residents on streets without other entry points as much as possible. However, occasions when we cannot maintain access we will call in to see you to discuss any specific requirements you may have.*

From December 15th 2026 to December 21st 2026

Road closure from the junction of West Avenue to the junction of Letchworth Road

The traffic management will be installed and maintained by: **Sunbelt Rentals 01908 579985**

If you require any further information, please contact JT Utilities 0203 8404 826

Yours sincerely

JT Utilities
